

Bevnetic POS

Screen-by-screen demo guide

A clickable proof of concept for liquor stores: checkout built for 21+ sales, AI purchasing and pricing, inventory intelligence, compliance, and multi-store control.

Every screen in the prototype, what it's for, what you can do on it, and who uses it.

Demo store: Oak Street Liquor #014, Sacramento, CA · demo clock Friday, Sep 25, 2026 · all figures are demo data

How to use this guide

TRYING IT YOURSELF

Open the prototype and press ► **Demo** in the top bar for a 23-step guided tour, or click any screen in the left menu. Everything is clickable. The pencil button shows build notes for each screen; the moon button switches to dark mode.

TOP BAR

Store pill: switch store or open All Stores (owners). **Name pill:** sign in as someone else with a PIN (owner Priya 1111, manager Alex 2222, cashiers Maria 3333, Dev 4444, Sam 5555). **Online pill:** simulate the internet going down. **Bell:** alerts.

WHO SEES WHAT

ROLE	SCREENS
Cashier	Register, Customer Display, Sales & Returns, Shifts & Staff, Receiving & Counts, Damaged Goods. Larger discounts, refunds over \$50 and typed birthdates need a manager PIN.
Manager	Everything except All Stores and Store Settings. Works at their own store.
Owner	Everything, every store.

Full detail with screenshots for each role: pages 3–8.

Signing in

Everyone signs in with their own 4-digit PIN.

Tap the name button in the top bar, pick a person, enter their PIN

HOW IT WORKS

- Each person has a PIN; the app shows only what their role allows
- Switching user takes a few seconds, so a manager can step in on a cashier's lane to approve something
- Every sale, discount, refund and approval is logged with who did it

DEMO PEOPLE AND PINS

- Priya N. · owner · 1111
- Alex K. · manager · 2222
- Maria G. · cashier · 3333
- Dev P. · cashier · 4444
- Sam R. · cashier · 5555

Who can do what

Taken from the same rules the app enforces. "Manager PIN": a cashier starts it, a manager approves.

05 BY ROLE Owner

Priya sees and changes everything, at every store.

The store switcher: only owners can move between stores or open head office

WHAT THE OWNER SEES

- Every screen, including All Stores and Store Settings
- Every store: switch from the top bar, or compare them all on All Stores

ONLY THE OWNER CAN

- Switch stores, move stock between stores, set per-store prices and offers, add a store
- Change sales tax, CRV rates and alcohol sale hours
- Edit receipt text, users, roles and printers

All 22 screens

06 BY ROLE Manager

Alex runs one store day to day.

Alex's menu: everything except All Stores and Store Settings

WHAT THE MANAGER SEES

- Command Center, Reports, Register and every Store, Intelligence and Growth screen
- Their own store only; the store switcher is locked

Opening Store Settings as a manager: "A manager needs to open this" with Switch user

WHAT THE MANAGER DOES

- Approves with their PIN: discounts 15–30%, refunds over \$50, typed dates of birth, count adjustments
- Sets up new products cashiers send them
- Runs pricing, purchasing, vendors, invoices, offers and reports
- Sees shift cash history and staff hours

NOT FOR MANAGERS

- All Stores (head office)
- Store Settings: tax, CRV, sale hours, receipts, users

20 of 22 screens

07 BY ROLE Cashier

Maria, Dev and Sam sell, take returns and look after the shelves.

Maria's menu has 6 screens: Register, Customer Display, Sales & Returns, Shifts & Staff, Receiving & Counts, Damaged Goods

WHAT THE CASHIER SEES

- The six screens above; any other screen shows “A manager needs to open this” with Switch user
- Their own clock-in, not other people's hours

Shifts & Staff as a cashier: own time clock only; cash history and staff hours are hidden

WHAT THE CASHIER DOES

- Sells, scans IDs, approves a clearly-older customer by eye (logged), refuses sales
- Discounts up to 15%, returns up to \$50, digital receipts
- Opens and closes the till with a blind count: expected cash appears only after they submit
- Receives deliveries, counts shelves, reports damage

6 of 22 screens

Cashier: when a manager is needed

Cashiers can start these, and a manager finishes them.

Discount \$15.80 (20.0%) · logged with cashier, reason and time

Cancel

Apply discount

Discount over 15%: the cashier sets it up, and a manager types their PIN to apply it

NEEDS A MANAGER PIN

- Discounts from 15% to 30% (over 30% is blocked for everyone, so alcohol never sells below cost)
- Refunds over \$50
- Typing a date of birth when an ID won't scan (under 21 is always blocked)

Barcode not recognized

0 99999 00001 7

Often a new label on a product you already sell. Pick the product in the customer's hand to link this barcode to it.

Search your products

Tito's Handmade Vodka

1.75 L · \$34.99

Jameson Irish Whiskey

750 ml · \$29.99

Casamigos Blanco

750 ml · \$54.99

Hennessy VS Cognac

750 ml · \$44.99

The link is saved for next time and a manager reviews it. A different size or pack is a different product.

It's a new product

Link barcode and add to sale

Unknown barcode: link it to an existing product, or tap "It's a new product" to send it to a manager

GOES TO A MANAGER

- New products: the barcode waits on the manager's Inventory screen to be set up
- Stock count differences: a manager approves the adjustment

Command Center

The owner's morning briefing.

WHAT IT'S FOR

Opens on yesterday's numbers and the five things that need attention today, ranked by money at stake. Every item links to the screen that fixes it.

WHAT YOU CAN DO

- KPI strip: sales, gross margin, inventory value, low stock, expiring, supplier follow-ups, payments due
- AI "5 things today" list, each with a fix-it button
- Today so far: sales by hour against the forecast, and sales by category
- This week's vendor deals worth taking

WHO USES IT

Owner, manager

10 BUSINESS Reports

End of day, date range, monthly, yearly and tax reports, ready to print.

WHAT IT'S FOR

Builds the end-of-day (Z) report at close and a live X-report during the day, plus longer-range sales reports and the monthly sales tax report for the state return.

WHAT YOU CAN DO

- End of day: gross → net sales, tax, CRV, payments by type, cash drawer (float, paid outs, drops, expected, counted, over/short), ID checks, sales by hour, category and cashier
- Date range, monthly vs last year and yearly views
- Accounting & tax: QuickBooks / Xero connection, sales tax report, daily journal entry
- Print on a full page or the 80 mm receipt printer; email at close

WHO USES IT

Owner, manager

All Stores

Head office view when you run more than one store.

WHAT IT'S FOR

Compares every store live and keeps them working as one business: stock moves between stores before anyone reorders, and prices and offers stay in sync.

WHAT YOU CAN DO

- Overview: each store's sales vs last week, margin, staff on shift, over/short, low stock, alerts, online or offline
- Stock & transfers: stock at every store, AI “move stock before you reorder”, transfers Requested → Picked → In transit → Received
- Prices & offers: same prices everywhere or per store; choose which stores run each offer
- Store setup: licence, tax rate, lanes, manager; add a store by copying another
- Store switcher in the top bar changes stock, prices and tax

WHO USES IT

Owner only

12 SELL Register

A checkout built for liquor stores.

WHAT IT'S FOR

Product cards with drawn bottle and package art show price, age limit, offers and how many are left in stock. The order on the right applies offers, CRV (bottle deposit) and tax automatically.

WHAT YOU CAN DO

- Tap, search or scan a barcode; an unknown barcode can be linked to a product or set up as new
- Offers apply by themselves (e.g. Bud Light 2 for \$24)
- Counter AI suggests add-ons (limes with tequila, chips with beer)
- Sold out? One tap shows the best swap, or which other store has it
- Line or whole-sale discounts with limits; members get 5% off
- Mixers and snacks tabs; “No tax” badge on food; after-hours lock on alcohol

WHO USES IT

Cashier, manager, owner

ID check

Every 21+ sale is verified before payment.

WHAT IT'S FOR

Scanning the licence barcode checks authenticity, expiry and age on the device in about two seconds. Payment stays locked until it passes, and only the result is stored, not the ID image.

WHAT YOU CAN DO

- Scan pass or fail (under 21 is always blocked)
- Store ID policy: scan everyone, under 40 or under 30
- No-scan options: approve by eye when the customer is clearly over the store's age (logged), or type the date of birth with a manager PIN
- Every check is logged for the inspection report

WHO USES IT

Cashier, manager, owner

Payment

Card, tap, cash or split, online or offline.

WHAT IT'S FOR

Sends the total to the card reader. If the internet drops, cards are stored securely and uploaded when it returns (limit \$250 per sale). The small customer screen shows the amount due at the same time.

WHAT YOU CAN DO

- Card, tap / wallet, cash with quick amounts, split tender
- Offline mode with a queued-payments counter in the top bar
- After approval the customer picks Text, Email, Print or No receipt
- Stock drops the moment the sale completes

WHO USES IT

Cashier, manager, owner

Bottle & can returns

Empty containers become money off the purchase.

Bottle & can returns
✕

Count the empty containers the customer brings back. Each one is refunded at its California redemption value (CRV).

Aluminum cans under 24 oz · \$0.05 each	− 36 + +6 +12 +24	\$1.80
Plastic bottles under 24 oz · \$0.05 each	− 10 + +6 +12 +24	\$0.50
Glass bottles under 24 oz · \$0.05 each	− 6 + +6 +12 +24	\$0.30
Cans and bottles 24 oz or more · \$0.10 each	− 1 + +6 +12 +24	\$0.10

53 containers \$2.70

Not refundable: wine and liquor bottles (no CRV), dirty or broken containers.

Give the refund as

Take off this purchase

Cash from the drawer

Taken off the total after tax. The refund is money back to the customer, not a price discount, so sales tax doesn't change. Anything more than the total is paid in cash.

Cancel

WHAT IT'S FOR

When a customer brings back empty cans and bottles, the cashier counts them by type. Each container is refunded at its California redemption value (CRV) and taken off the purchase, or paid in cash.

WHAT YOU CAN DO

- Aluminum, plastic and glass under 24 oz at 5¢; anything 24 oz or more at 10¢ (rates from Settings)
- Quick +6, +12 and +24 buttons for packs and cases
- Taken off after tax: it's money back, not a discount, so tax doesn't change; any extra is paid in cash
- Warns over 50 of one material (the store may pay by weight); wine and liquor bottles aren't refundable
- Shown on the order, customer screen, printed and digital receipts, and the end-of-day report

Who can do what

Same rules the app enforces - you are Priya N. (owner)

WHAT IT'S FOR

Staff sign in with a PIN. The till is opened by counting the float and closed with a blind count: the expected cash appears only after the cashier submits, and any difference goes on the end-of-day report.

WHAT YOU CAN DO

- Open and close the till with a count by bill
- Time clock with weekly hours (cashiers see only their own)
- Recent shifts with over/short (managers and owners)
- “Who can do what” table built from the same rules the app enforces

WHO USES IT

Everyone

Bevnetic POS · clickable prototype · demo data

18

WHAT IT'S FOR

Tiles are coloured by urgency (critical, warning, overstock, healthy) and show stock left, days left, vendor and the last order. Tap a tile for the full picture and a one-tap reorder.

WHAT YOU CAN DO

- Filter by state; switch to a list sorted by urgency
- Detail: reorder point, delivery time, open order, cost, price, target margin, last sale
- Each product holds several codes (store SKU, bottle and case barcodes, vendor codes); possible duplicates can be merged
- AI action list; + Add product

WHO USES IT

Manager, owner

Add a product

New products in under a minute, including mixers and snacks.

Add a product

Pack Label

WHAT IT'S FOR

Opens from Inventory, from an invoice line the AI doesn't recognise, or from an unknown barcode at the register (cashiers send it to a manager). Picking the type fills in sensible defaults.

WHAT YOU CAN DO

- Type: spirits, wine, beer & seltzer, mixers & ice, snacks
- CRV worked out from size and pack for drink containers only; snacks default to not taxed
- Case cost → cost per unit → suggested shelf price from the target margin (never below cost)
- "Fill in with AI" reads the name, invoice line or barcode
- Duplicate check offers "Use existing instead"; live register-card preview

Take the deal: pay for 10, receive 11 cases
\$1,446.00 total · **\$131.45 per case** (+1 free). Saves \$144.60 against Summit's list price. The 3 extra cases sell in about 11 days, so the deal is worth it. Add to Summit PO

No deal		Lowest cost per case Deal 1		Deal 2	
Buy just what you need Summit Wine & Spirits list price, \$144.60 a case BEST PLAN WITH THIS OPTION \$144.60 per case Pay for 8 cases Receive 8 cases Total \$1,156.80 Extra stock none Add 8 cases to PO		Buy 10 cases, get 1 free From October deal sheet (PDF) · ends Oct 31 BEST PLAN WITH THIS OPTION \$131.45 per case Pay for 10 cases Receive 11 cases (+1 free) Total \$1,446.00 Extra stock 3 cases · 11 days Free-goods deal · checked against state rules Add 11 cases to PO		8% off every case at 15+ cases From Rep email, forwarded · ends Nov 30 BEST PLAN WITH THIS OPTION \$133.03 per case Pay for 15 cases Receive 15 cases (8% off) Total \$1,995.48 Extra stock 7 cases · 26 days Add 15 cases to PO	

Each brand is sold by one distributor in your area, so Bevnetic compares that distributor's own options. Different products still come from different vendors, and each vendor gets its own PO.

WHAT IT'S FOR

Each brand comes from one distributor, often with several deals (free cases, discounted extra case, volume tiers). Bevnetic compares buying just what you need with each deal, and picks the lowest cost per case that doesn't leave more than 30 days of extra stock.

WHAT YOU CAN DO

- Compare options side by side as cost per case
- Flags deal traps (a “free” case that ties up cash for months)
- Different products from different vendors become one draft PO per vendor
- PO tracker

WHO USES IT

Manager, owner

23 BUY Purchasing · Vendor deals

How you find out about deals like “buy 10 cases, get 1 free”.

The screenshot displays the 'Purchasing' module of the Bevnetic POS system. The interface is divided into several sections:

- Header:** Includes the Bevnetic logo, user information (Oak Street, 3 Stores, Priya N., Owner), and system status (Online, synced).
- Navigation Sidebar:** Lists various business functions such as Command Center, Reports, All Stores, Register, Customer Display, Sales & Returns, Shifts & Staff, Inventory, Receiving & Counts, Vendors, Pricing, Damaged Goods, Compliance, Forecasting, and Shelf Optimizer.
- Main Content Area:**
 - Deal check:** A tab for managing deals, currently showing 5 new vendor deals.
 - Add vendor deals:** A section for adding new deals, including options to drop a deal sheet or snap a flyer, forward rep emails, and access a vendor portal.
 - Review new deals:** A table listing 5 deals to review. Each row includes the product name, match percentage, dates, and a recommendation. For example, 'Tito's Handmade Vodka 1.75 L' has a 99% match and is recommended as 'Worth it: saves \$144.60 on your next order'.
 - Active deals:** A section showing 4 active deals, including 'Summit Wine & Spirits - Tito's Handmade Vodka 1.75 L'.

WHAT IT'S FOR

Drop in a vendor's deal sheet or flyer, forward a rep's email, or let reps post in a vendor portal. AI reads each line, matches it to your catalog and says whether it's worth taking.

WHAT YOU CAN DO

- Each line: best option, not worth it, price increase, or a product you don't sell
- Confirmed deals raise alerts and feed Deal check
- Deals summary on the Command Center

WHAT IT'S FOR

Vendor list with what you owe and on-time rate; each vendor shows licence, contact, terms, delivery days, minimum order, products supplied, open POs and active deals.

WHAT YOU CAN DO

- Search vendors; see balance and due dates
- Add vendor: wholesale licence check (required), rep, terms, delivery days, how POs are sent
- Warns when a brand moves from its current distributor and hands it over in Deal check

WHO USES IT

Manager, owner

25 BUY Pricing

New vendor costs become new shelf prices at your target margin.

The screenshot shows the Bevnetic Pricing interface. The top navigation bar includes the Bevnetic logo, the title 'Pricing', and user information: '014 Oak Street · 3 Stores', 'PN Priya N. · Owner', 'Online · synced', and a 'Demo' button. The main dashboard features four key metrics: 7 cost changes from 3 vendor documents, 4 products now below target margin, 0 prices updated today, and 0 shelf tags waiting to print. Below these are three sections: 'New costs come from' with links to 'Invoice HB-58812 · Summit Wine & Spirits', 'Summit price sheet · October', and 'Valley Beer price sheet · October'; 'Margin rules' showing category defaults for Spirits (28%), Wine (35%), Beer & Seltzer (22%), Mixers (40%), and Snacks (45%); and 'PRICE ENDINGS' with a dropdown set to '.99'. The bottom section, 'Suggested shelf prices', shows 4 items below target, with buttons for 'GOES LIVE Now', 'Tomorrow 6 AM', and 'Approve 4 prices'. A table at the bottom lists product details: PRODUCT, COST PER UNIT, SHELF PRICE NOW, TARGET MARGIN, NEW PRICE, NEW MARGIN, and SUGGESTION.

WHAT IT'S FOR

Costs flow in from vendor price sheets, POs and invoices. Each product has a target margin: its own rule beats a brand/group rule, which beats the category default. The suggested price is $\text{cost} \div (1 - \text{margin})$, rounded to .99 or .49.

WHAT YOU CAN DO

- Cost change → new margin → suggested price, with margin and markup shown
- “Below target · raise”, “Still above target · keep”, “Cost fell · could lower”
- 10% change flag and below-cost block
- Approve now or at 6 AM; register updates and shelf tags are queued

WHAT IT'S FOR

Log a damaged item in seconds with a photo; stock adjusts. Damaged deliveries become supplier claims tracked Draft → Submitted → Credited.

WHAT YOU CAN DO

- Reason, where it happened and what to do with it (write off, claim, sell at 30% off, return)
- Supplier claim tracker
- Damage log and loss pattern

WHO USES IT

Cashier, manager, owner

**WHAT IT'S FOR**

Shows the legal sale-hours timeline (the register locks alcohol after 2 AM), the rules the register enforces, the store ID policy and every sale made without an ID scan.

WHAT YOU CAN DO

- Sale-hours lock with demo clock
- ID policy switch: scan everyone, under 40 or under 30
- Log of sales without a scan; refusal log; cashier scorecard
- One-tap inspection report

WHO USES IT

Manager, owner

28 INTELLIGENCE Forecasting

Predict demand, don't just track it.

WHAT IT'S FOR

28 days of history plus a 14-day forecast band per product, with the stockout date marked and the drivers explained (weekends, weather, local events).

WHAT YOU CAN DO

- Forecast band and stockout marker
- Drivers that move demand
- Reorder recommendation: how much, and by when

WHO USES IT

Manager, owner

Shelf Optimizer

Dead stock out, best sellers in.

WHAT IT'S FOR

Finds products that haven't sold in months and the cash they tie up. For each, it suggests a clearance plan and a replacement that sells on the same shelf in similar stores.

WHAT YOU CAN DO

- Dead stock: clearance offer + replacement with profit per month; one tap starts both
- Best sellers: top 10 by profit, revenue or units over 7, 30 or 90 days
- Trend, days of stock left and reorder buttons

32 GROW Customers

Loyalty members and who to talk to.

The screenshot displays the Bevnetic POS interface. On the left is a dark sidebar with navigation options: BUSINESS (Command Center, Reports, All Stores), STORE (Register, Customer Display, Sales & Returns, Shifts & Staff, Inventory, Receiving & Counts, Purchasing, Vendors, Pricing, Damaged Goods, Compliance), and INTELLIGENCE (Forecasting, Shelf Optimizer). The main area is titled 'Customers' and shows 2,418 loyalty members. At the top, it indicates '014 Oak Street - 3 Stores', 'PN Priya N. - Owner', 'Online - synced', and a 'Demo' button. The central focus is the profile of 'Jordan D.', a member since 2023 with a phone number (916) 014-2000 and SMS opt-in. His profile shows a 'Gold tier' with 1,240 points (260 points to Platinum) and 'USUALLY BUYS' items like Casamigos Blanco, Limes, Modelo 12pk, and Fever-Tree. Metrics include 5.2 visits/month, a \$71 average basket, and a Saturday last visit. A 'Suggest at counter' alert indicates Casamigos is back in stock. To the right, three AI segments are shown: 'Wine' (412 Weekend wine buyers), 'Spirits' (188 Tequila fans), and 'Beer' (636 Game-day beer runs). Below these, a 'Win-back' segment shows 97 Lapsing regulars. A 'Campaign - Weekend wine buyers' section for 412 members offers a '10% off Wine this weekend' with a predicted redemption of 14% and an estimated revenue of +\$2,300. A preview of the offer message is shown in a box: 'Hi Jordan! This weekend only: 10% off wine at Oak Street Liquor. Show this text at checkout. Reply STOP to opt out.'

WHAT IT'S FOR

Member profiles with purchase history, AI segments (e.g. weekend wine buyers, lapsing regulars) and SMS campaigns.

WHAT YOU CAN DO

- Member profile and points
- AI segments with size and value
- SMS campaign preview
