

Bevnetic POS

Screen-by-screen demo guide

A clickable proof of concept for liquor stores: checkout built for 21+ sales, AI purchasing and pricing, inventory intelligence, compliance, multi-store control, owner tools, staff scheduling, loss prevention, marketing and support.

Every screen in the prototype, what it's for, what you can do on it, and who uses it.

Demo store: Oak Street Liquor #014, Sacramento, CA · demo clock Friday, Sep 25, 2026 · all figures are demo data

How to use this guide

TRYING IT YOURSELF

Open the prototype and press ► **Demo** in the top bar for a 23-step guided tour, or click any screen in the left menu. Everything is clickable. The pencil button shows build notes for each screen; the moon button switches to dark mode.

TOP BAR

Store pill: switch store or open All Stores (owners). **Name pill:** sign in as someone else with a PIN (owner Priya 1111, manager Alex 2222, cashiers Maria 3333, Dev 4444, Sam 5555). **Online pill:** simulate the internet going down. **Bell:** alerts.

WHO SEES WHAT

ROLE	SCREENS
Cashier	Register, Customer Display, Sales & Returns, Shifts & Staff, Receiving & Counts, Shelf Labels, Damaged Goods, Help & Support. Larger discounts, refunds over \$50 and typed birthdates need a manager PIN.
Manager	Everything except All Stores, Owner App, Profit & Budget, Data Export and Store Settings. Works at their own store.
Owner	Everything, every store.

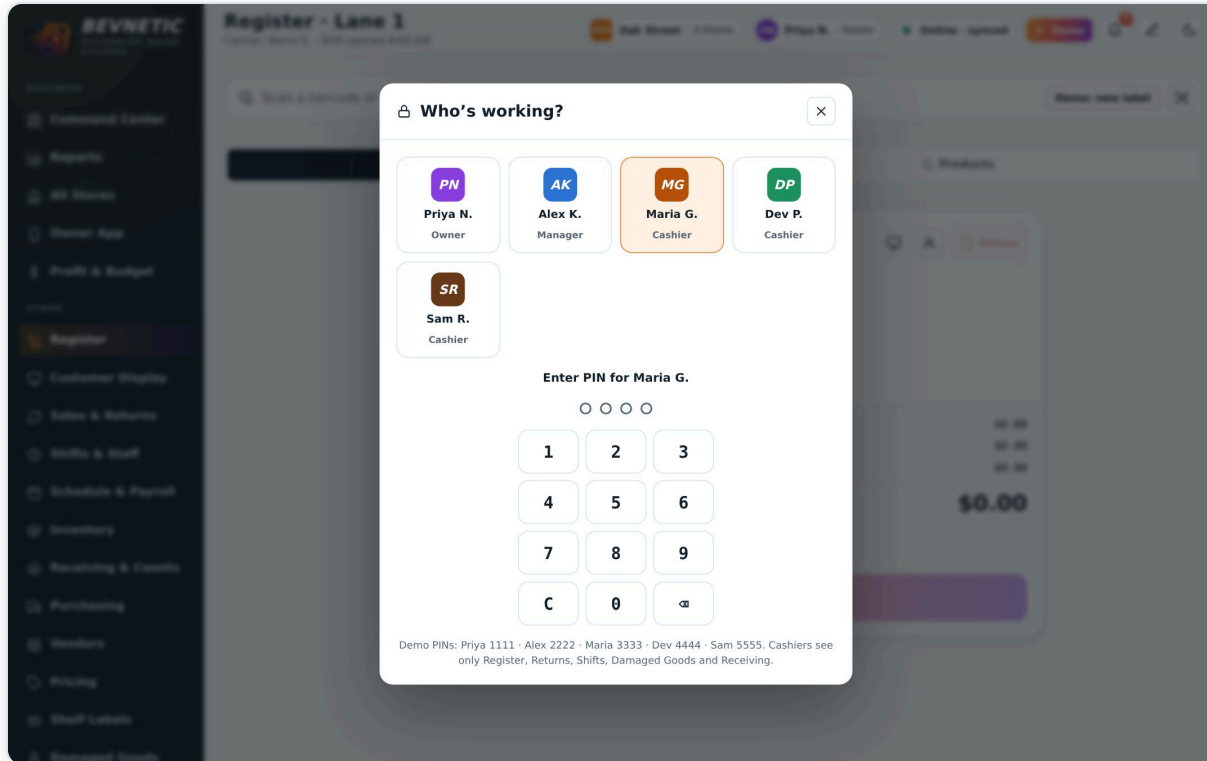

Full detail with screenshots for each role: pages 3–8.

Signing in

Everyone signs in with their own 4-digit PIN.

Tap the name button in the top bar, pick a person, enter their PIN

HOW IT WORKS

- Each person has a PIN; the app shows only what their role allows
- Switching user takes a few seconds, so a manager can step in on a cashier's lane to approve something
- Every sale, discount, refund and approval is logged with who did it

DEMO PEOPLE AND PINS

- Priya N. · owner · 1111
- Alex K. · manager · 2222
- Maria G. · cashier · 3333
- Dev P. · cashier · 4444
- Sam R. · cashier · 5555

Who can do what

Taken from the same rules the app enforces. “Manager PIN”: a cashier starts it, a manager approves.

05 BY ROLE Owner

Priya sees and changes everything, at every store.

The store switcher: only owners can move between stores or open head office

WHAT THE OWNER SEES

- Every screen, including All Stores, Owner App, Profit & Budget, Data Export and Store Settings
- Every store: switch from the top bar, or compare them all on All Stores

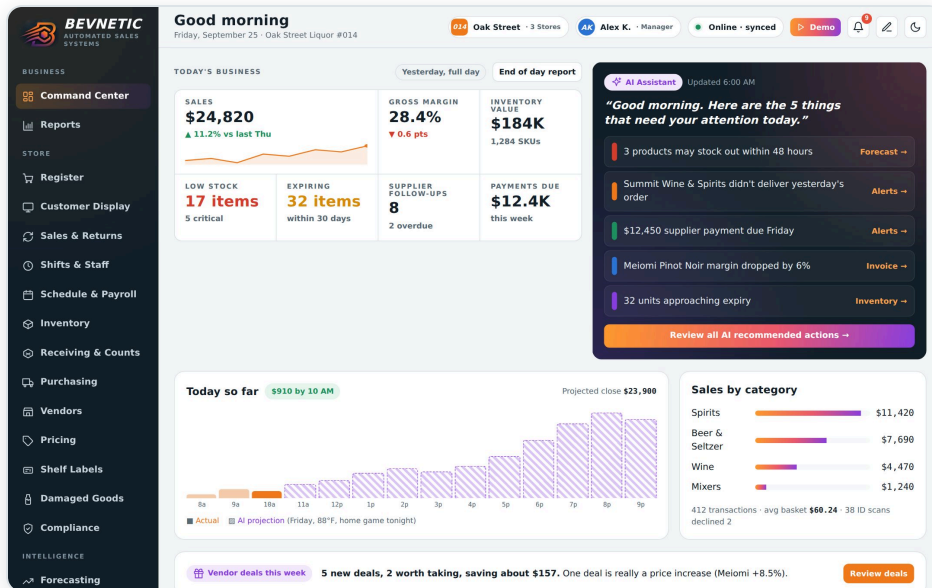

ONLY THE OWNER CAN

- Switch stores, move stock between stores, set per-store prices and offers, add a store
- Change sales tax, CRV rates and alcohol sale hours
- Edit receipt text, users, roles and printers
- Use the owner app, see real profit after expenses, export all the data

All 31 screens

06 BY ROLE Manager

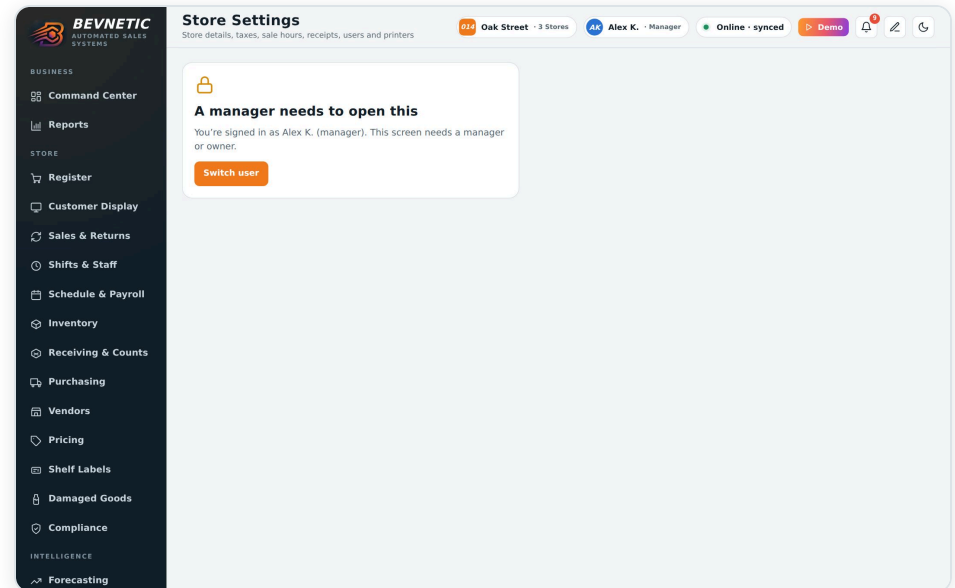

Alex runs one store day to day.

Alex's menu: everything except the five owner-only screens

WHAT THE MANAGER SEES

- Command Center, Reports, Register and every Store, Intelligence and Growth screen
- Their own store only; the store switcher is locked

Opening Store Settings as a manager: "A manager needs to open this" with Switch user

WHAT THE MANAGER DOES

- Approves with their PIN: discounts 15–30%, refunds over \$50, typed dates of birth, count adjustments
- Sets up new products cashiers send them
- Runs pricing, purchasing, vendors, invoices, offers and reports
- Sees shift cash history and staff hours
- Builds the schedule, approves swaps, exports payroll
- Reviews suspicious activity and camera clips; restores backups

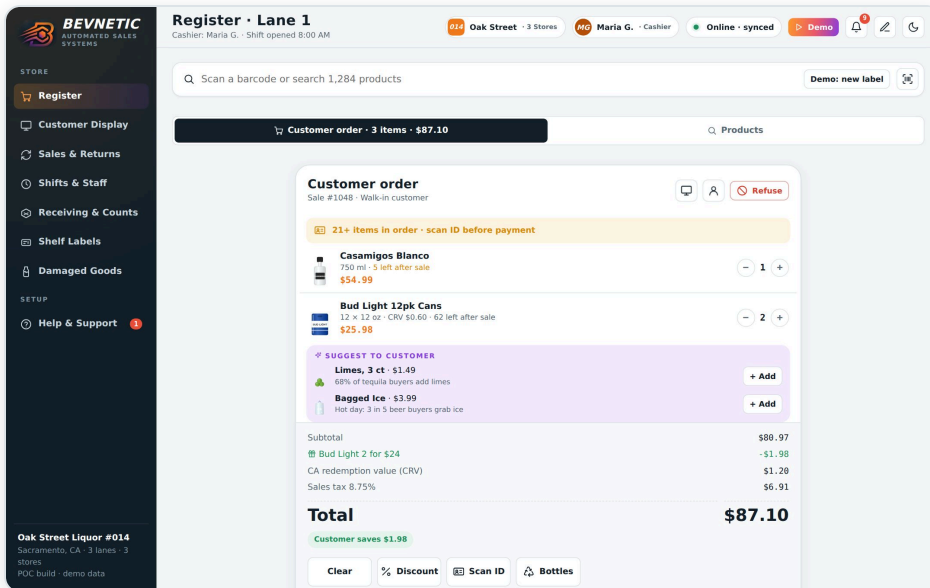

NOT FOR MANAGERS

- All Stores (head office)
- Owner App, Profit & Budget, Data Export
- Store Settings: tax, CRV, sale hours, receipts, users

26 of 31 screens

07 BY ROLE Cashier

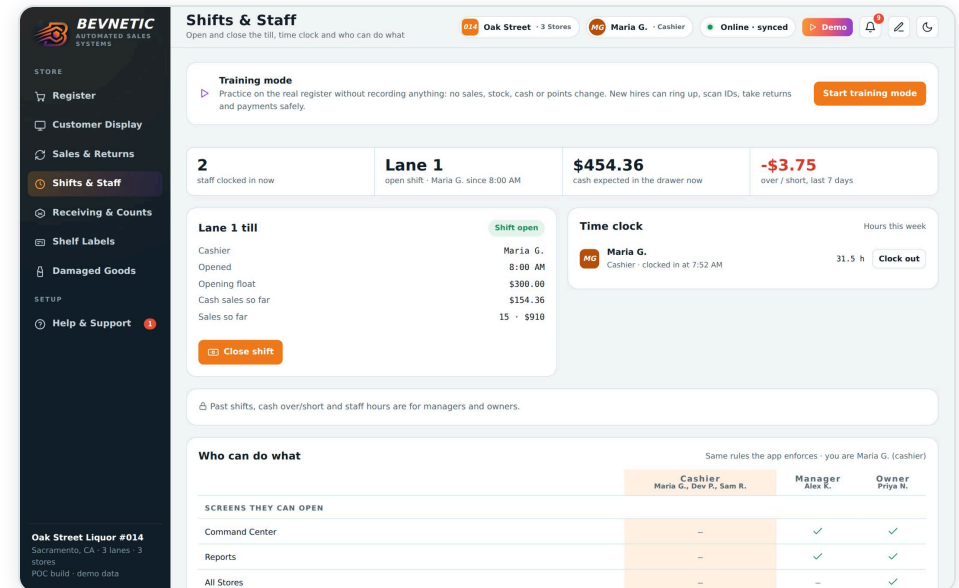

Maria, Dev and Sam sell, take returns and look after the shelves.

Maria's menu has 8 screens: Register, Customer Display, Sales & Returns, Shifts & Staff, Receiving & Counts, Shelf Labels, Damaged Goods, Help & Support

WHAT THE CASHIER SEES

- The eight screens above; any other screen shows "A manager needs to open this" with Switch user
- Their own clock-in, not other people's hours

Shifts & Staff as a cashier: own time clock only; cash history and staff hours are hidden

WHAT THE CASHIER DOES

- Sells, scans IDs, approves a clearly-older customer by eye (logged), refuses sales
- Discounts up to 15%, returns up to \$50, digital receipts
- Opens and closes the till with a blind count: expected cash appears only after they submit
- Receives deliveries, counts shelves, prints shelf labels, reports damage
- Uses loyalty rewards and tips at checkout; practises in training mode
- Raises support tickets; swaps shifts from the staff app

8 of 31 screens

Cashier: when a manager is needed

Cashiers can start these, and a manager finishes them.

Discount \$15.80 (20.0%) · logged with cashier, reason and time

Cancel

Apply discount

Discount over 15%: the cashier sets it up, and a manager types their PIN to apply it

NEEDS A MANAGER PIN

- Discounts from 15% to 30% (over 30% is blocked for everyone, so alcohol never sells below cost)
- Refunds over \$50
- Typing a date of birth when an ID won't scan (under 21 is always blocked)

Barcode not recognized

0 99999 00001 7

Often a new label on a product you already sell. Pick the product in the customer's hand to link this barcode to it.

Search your products

Tito's Handmade Vodka

1.75 L · \$34.99

Jameson Irish Whiskey

750 ml · \$29.99

Casamigos Blanco

750 ml · \$54.99

Hennessy VS Cognac

750 ml · \$44.99

The link is saved for next time and a manager reviews it. A different size or pack is a different product.

It's a new product

Link barcode and add to sale

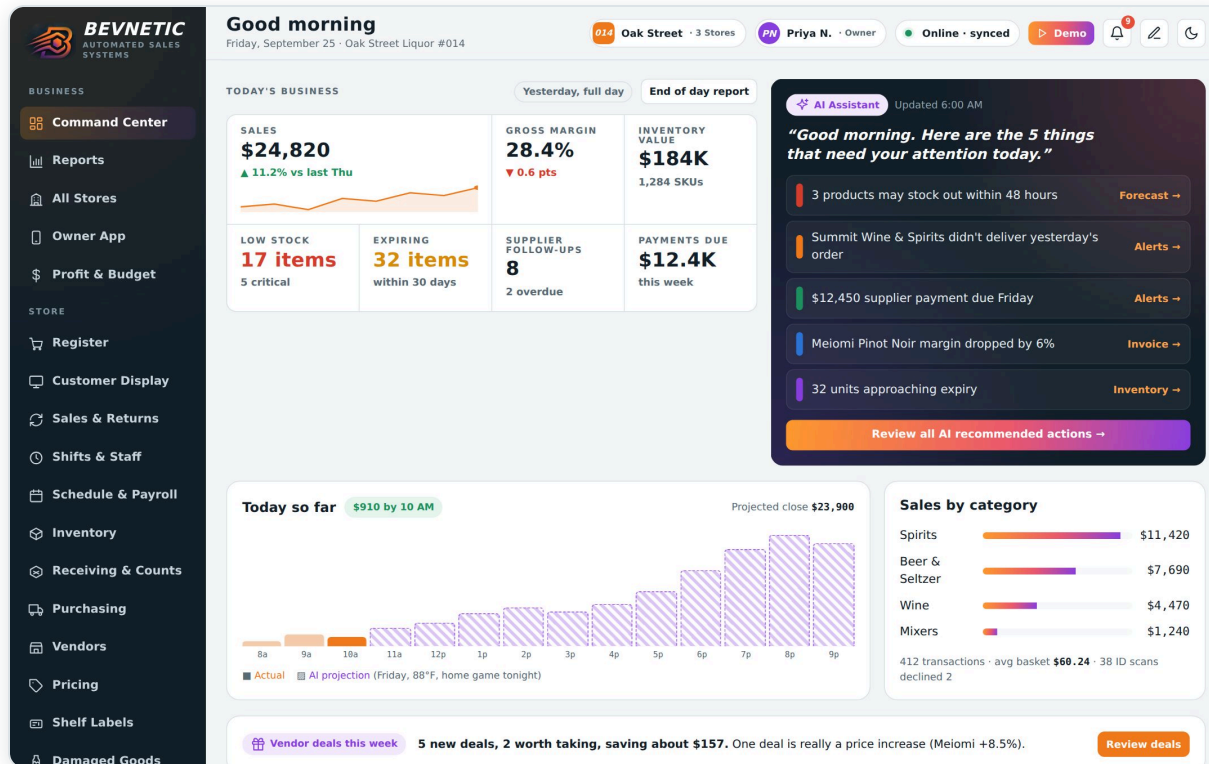

Unknown barcode: link it to an existing product, or tap "It's a new product" to send it to a manager

GOES TO A MANAGER

- New products: the barcode waits on the manager's Inventory screen to be set up
- Stock count differences: a manager approves the adjustment

09 BUSINESS Command Center

The owner's morning briefing.

WHAT IT'S FOR

Opens on yesterday's numbers and the five things that need attention today, ranked by money at stake. Every item links to the screen that fixes it.

WHAT YOU CAN DO

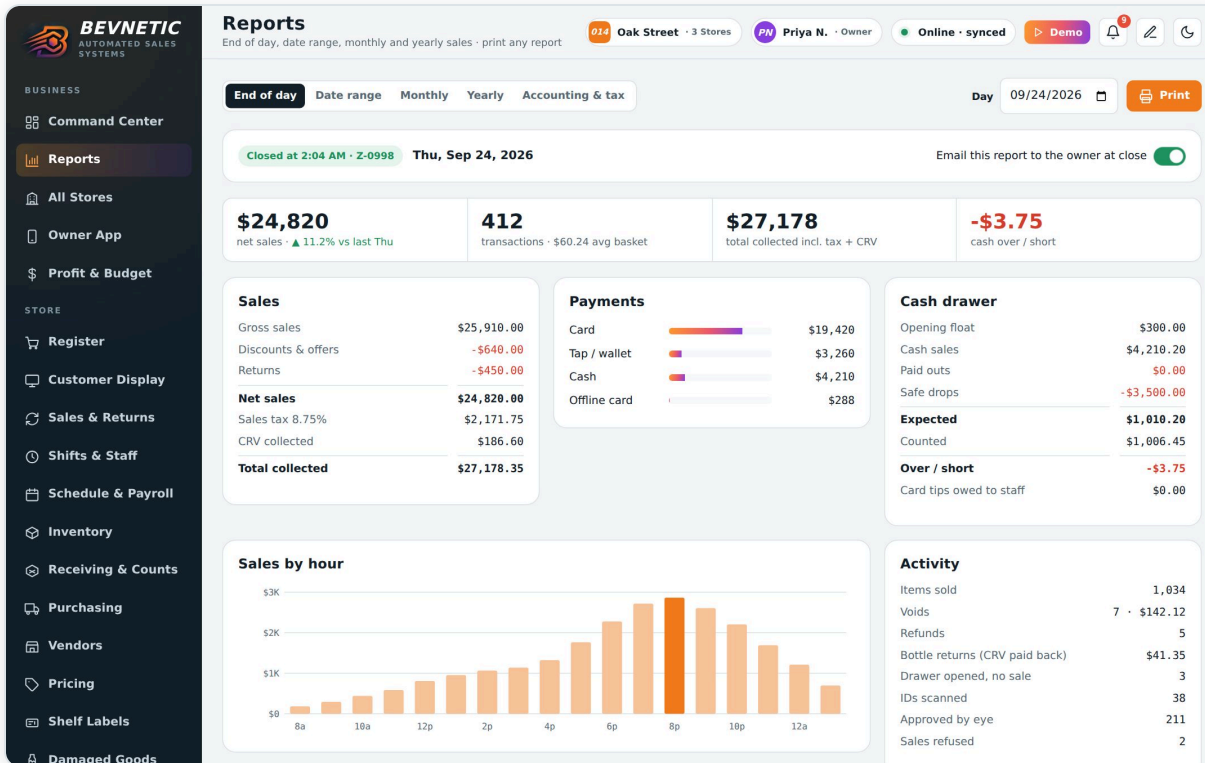

- KPI strip: sales, gross margin, inventory value, low stock, expiring, supplier follow-ups, payments due
- AI "5 things today" list, each with a fix-it button
- Today so far: sales by hour against the forecast, and sales by category
- This week's vendor deals worth taking

WHO USES IT

Owner, manager

10 BUSINESS Reports

End of day, date range, monthly, yearly and tax reports,
ready to print.

WHAT IT'S FOR

Builds the end-of-day (Z) report at close and a live X-report during the day, plus longer-range sales reports and the monthly sales tax report for the state return.

WHAT YOU CAN DO

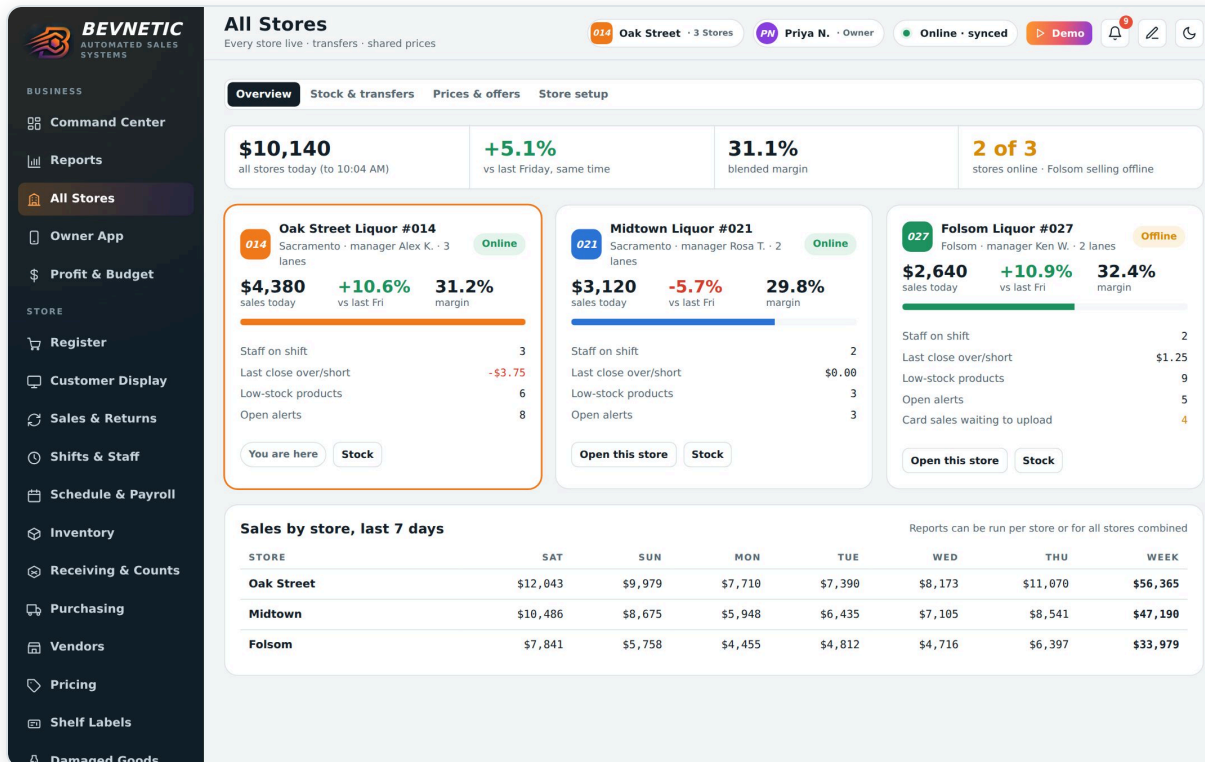

- End of day: gross → net sales, tax, CRV, payments by type, cash drawer (float, paid outs, drops, expected, counted, over/short), ID checks, sales by hour, category and cashier
- Date range, monthly vs last year and yearly views
- Accounting & tax: QuickBooks / Xero connection, sales tax report, daily journal entry
- Print on a full page or the 80 mm receipt printer; email at close

WHO USES IT

Owner, manager

All Stores

Head office view when you run more than one store.

WHAT IT'S FOR

Compares every store live and keeps them working as one business: stock moves between stores before anyone reorders, and prices and offers stay in sync.

WHAT YOU CAN DO

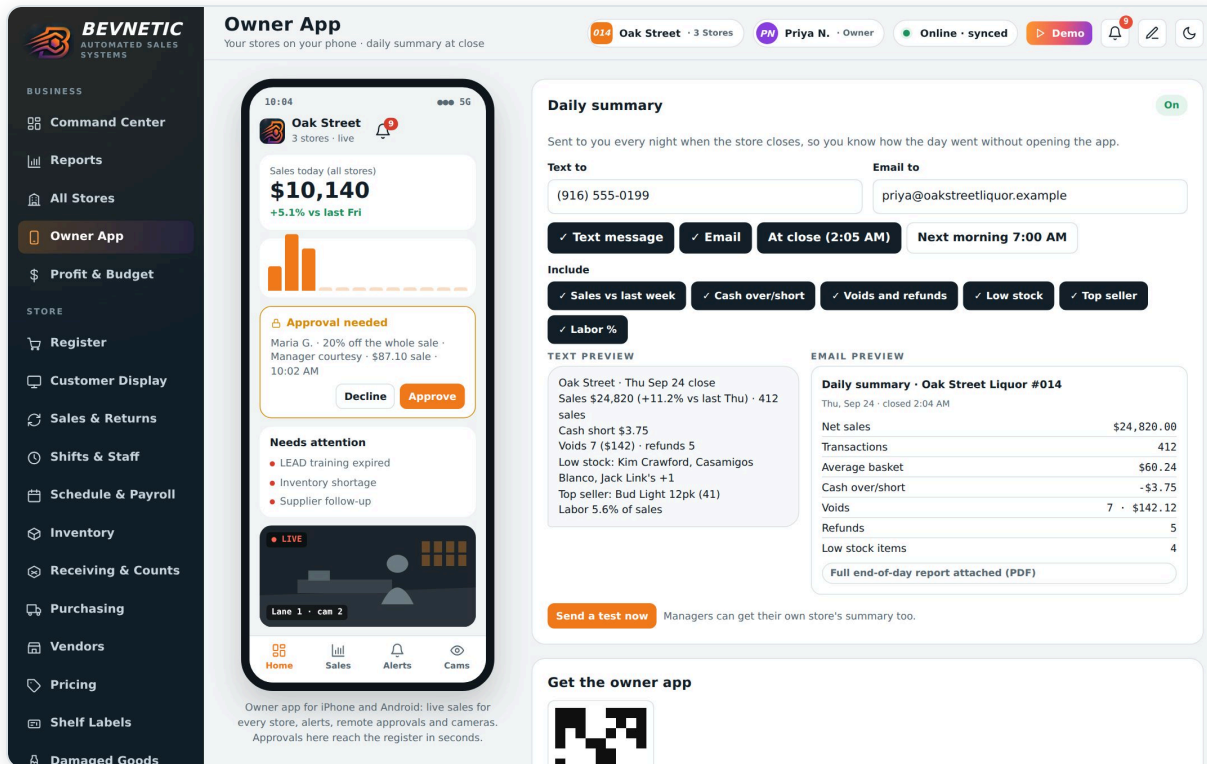

- Overview: each store's sales vs last week, margin, staff on shift, over/short, low stock, alerts, online or offline
- Stock & transfers: stock at every store, AI “move stock before you reorder”, transfers Requested → Picked → In transit → Received
- Prices & offers: same prices everywhere or per store; choose which stores run each offer
- Store setup: licence, tax rate, lanes, manager; add a store by copying another
- Store switcher in the top bar changes stock, prices and tax

WHO USES IT

Owner only

Owner App

The whole business in your pocket, and a summary every night.

WHAT IT'S FOR

Shows what the owner's phone app looks like: live sales for every store, alerts, approvals from the registers and a live camera. The daily summary arrives by text and/or email when the store closes, so the owner knows how the day went without opening anything.

WHAT YOU CAN DO

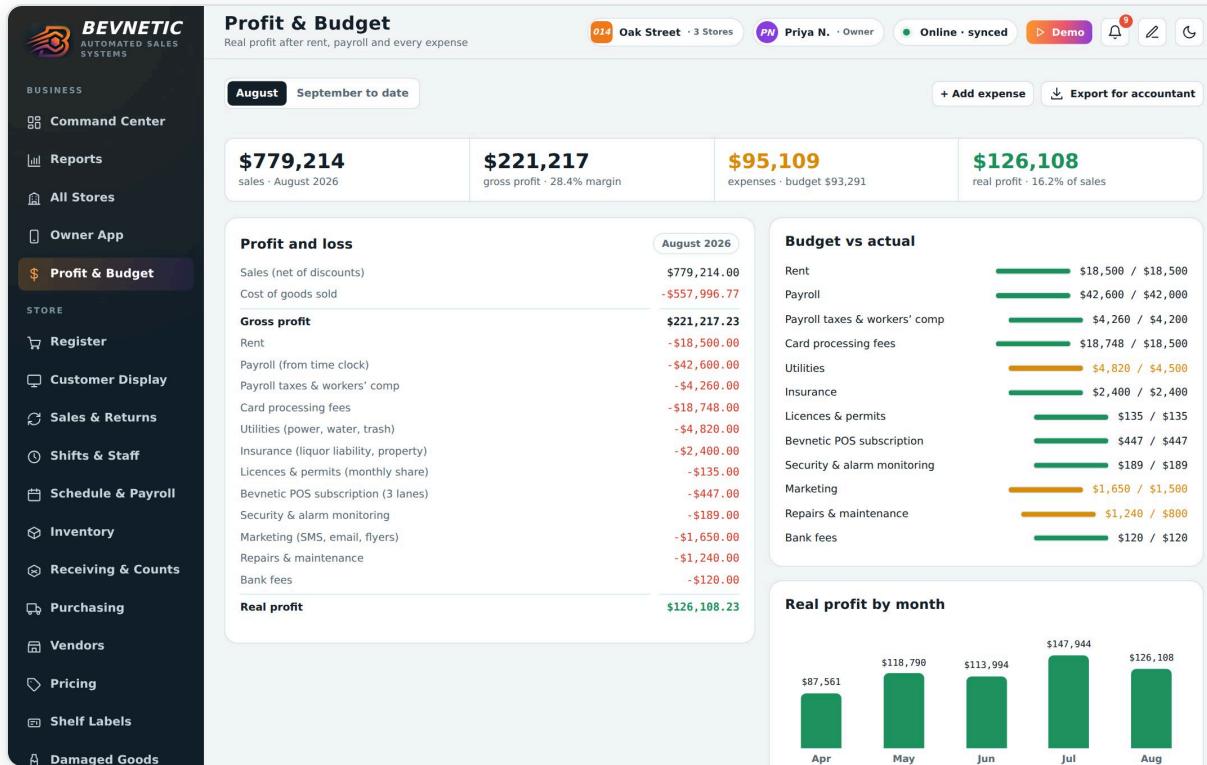

- Approve or decline a big discount or refund from the phone; the register unlocks in seconds
- Daily summary: sales vs last week, cash over/short, voids and refunds, low stock, top seller, labor %
- Choose text, email or both, and when it's sent; previews of both messages; send a test
- QR code to install the app; each phone is approved once

WHO USES IT

Owner only

Profit & Budget

Real profit, not just sales.

WHAT IT'S FOR

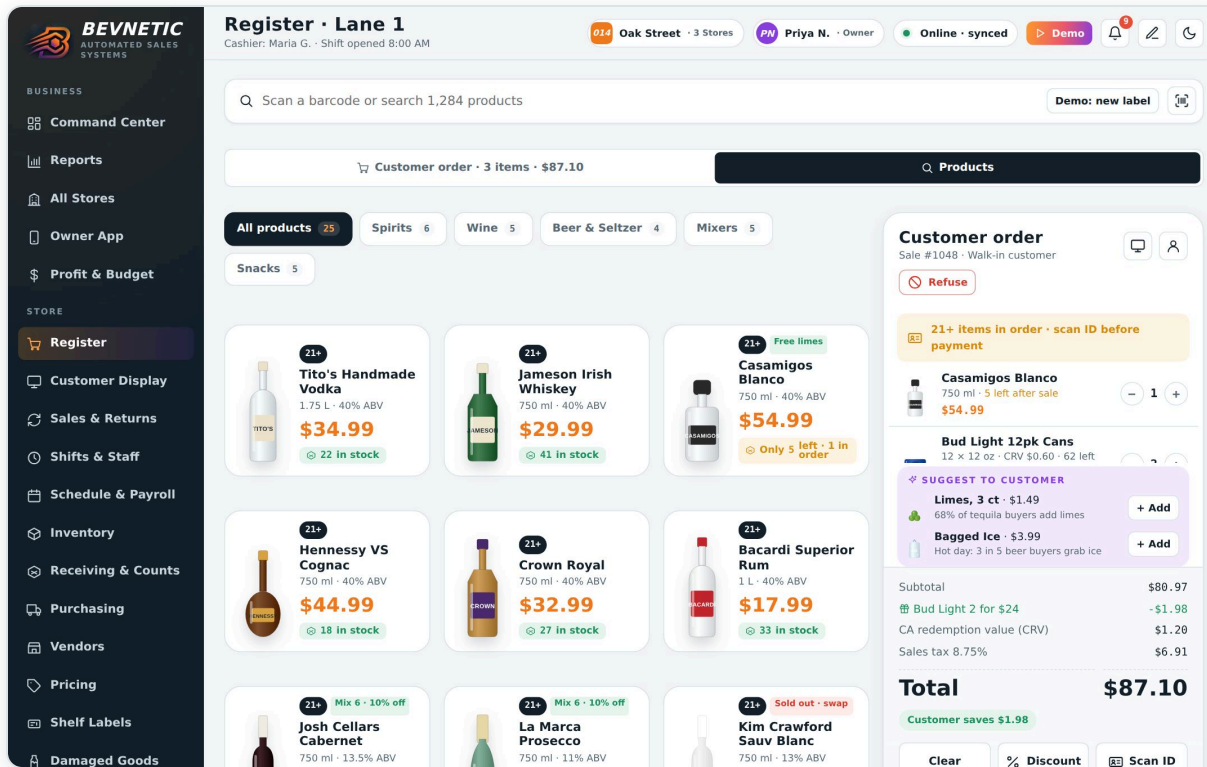

Starts from sales and cost of goods, then takes off rent, payroll, card fees, utilities, insurance, licences and every other expense to show what the business actually made, with a budget for each line.

WHAT YOU CAN DO

- Profit and loss for August or September so far
- Budget vs actual for each expense, over-budget lines in amber
- Real profit by month and the daily sales needed to break even
- Payroll comes from the time clock and card fees from card sales; add any other expense
- Export for the accountant

WHO USES IT

Owner only

**WHAT IT'S FOR**

Product cards with drawn bottle and package art show price, age limit, offers and how many are left in stock. The order on the right applies offers, CRV (bottle deposit) and tax automatically.

WHAT YOU CAN DO

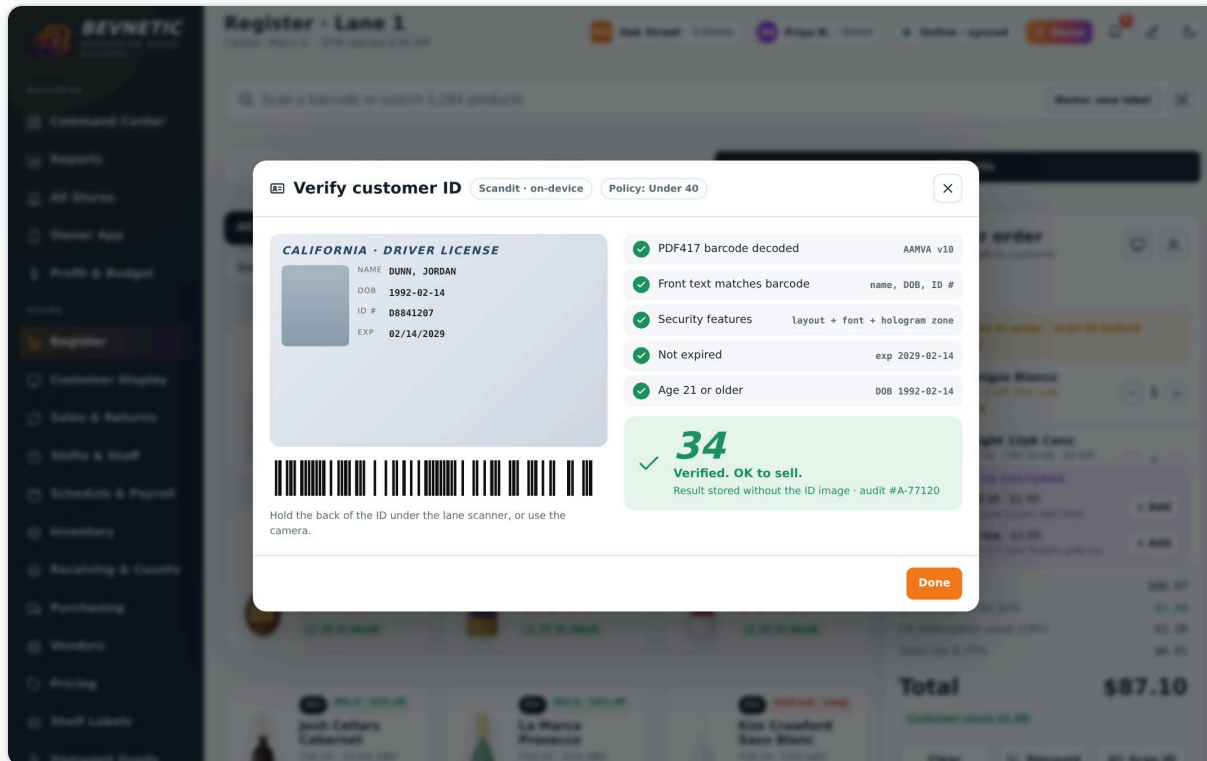

- Tap, search or scan a barcode; an unknown barcode can be linked to a product or set up as new
- Offers apply by themselves (e.g. Bud Light 2 for \$24)
- Counter AI suggests add-ons (limes with tequila, chips with beer)
- Sold out? One tap shows the best swap, or which other store has it
- Line or whole-sale discounts with limits; members get 5% off, see their points and can use a \$5 reward in one tap
- Mixers and snacks tabs; “No tax” badge on food; after-hours lock on alcohol

WHO USES IT

Cashier, manager, owner

ID check

Every 21+ sale is verified before payment.

WHAT IT'S FOR

Scanning the licence barcode checks authenticity, expiry and age on the device in about two seconds. Payment stays locked until it passes, and only the result is stored, not the ID image.

WHAT YOU CAN DO

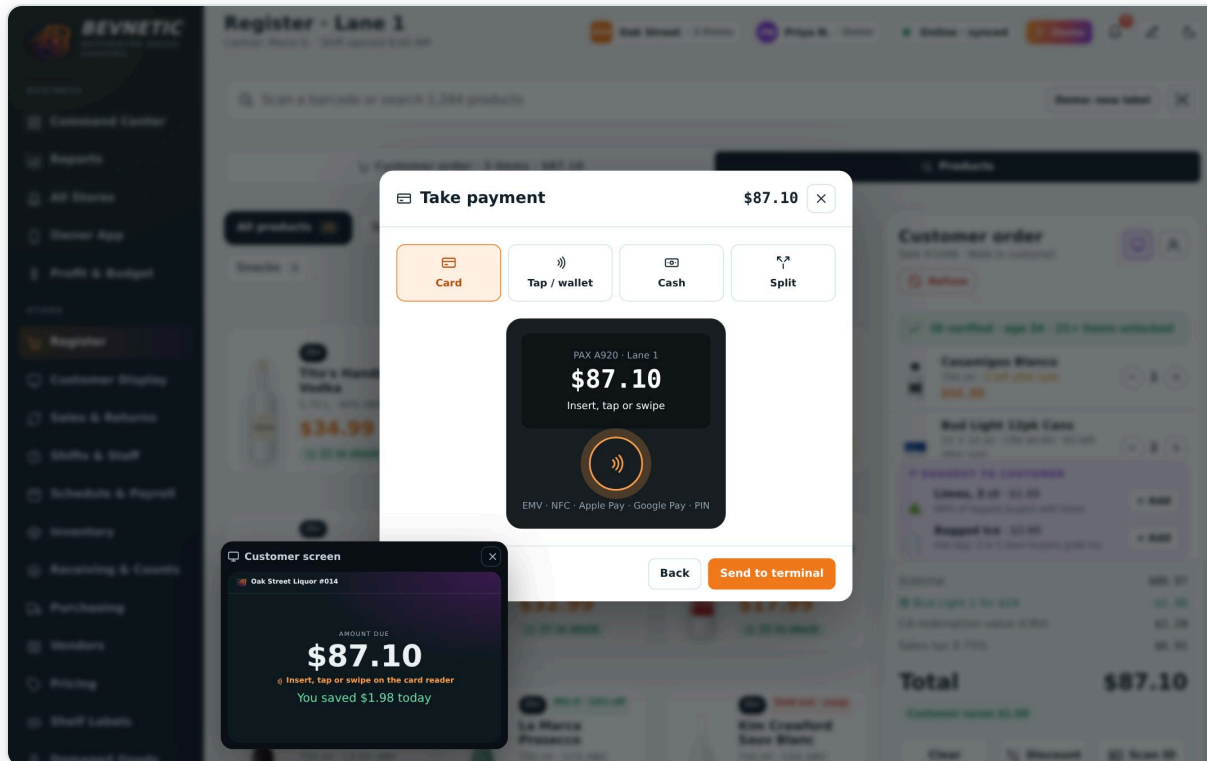

- Scan pass or fail (under 21 is always blocked)
- Store ID policy: scan everyone, under 40 or under 30
- No-scan options: approve by eye when the customer is clearly over the store's age (logged), or type the date of birth with a manager PIN
- Every check is logged for the inspection report

WHO USES IT

Cashier, manager, owner

Payment

Card, tap, cash or split, online or offline.

WHAT IT'S FOR

Sends the total to the card reader. If the internet drops, cards are stored securely and uploaded when it returns (limit \$250 per sale). The small customer screen shows the amount due at the same time.

WHAT YOU CAN DO

- Card, tap / wallet, cash with quick amounts, split tender
- Offline mode with a queued-payments counter in the top bar
- Optional tip on the card reader: 10%, 15%, 20% or no tip (turned on in Store Settings)
- After approval the customer picks Text, Email, Print or No receipt
- Stock drops the moment the sale completes

WHO USES IT

Cashier, manager, owner

WHAT IT'S FOR

When a member is on the sale, the order shows their points and what this sale earns, with a one-tap reward. If tips are on, the customer picks a tip on the card reader and it is added to the total.

WHAT YOU CAN DO

- Points balance and points earned on this sale
- Use \$5 reward (500 points); points update when the sale completes
- Tip choices: no tip, 10%, 15% or 20%, worked out before tax
- Tips show on the order, the end-of-day report and in payroll

WHO USES IT

Cashier, manager, owner

Bottle & can returns

Bottle & can returns
✕

Count the empty containers the customer brings back. Each one is refunded at its California redemption value (CRV).

Aluminum cans under 24 oz · \$0.05 each	- 36 + +6 +12 +24	\$1.80
Plastic bottles under 24 oz · \$0.05 each	- 10 + +6 +12 +24	\$0.50
Glass bottles under 24 oz · \$0.05 each	- 6 + +6 +12 +24	\$0.30
Cans and bottles 24 oz or more · \$0.10 each	- 1 + +6 +12 +24	\$0.10

53 containers \$2.70

Not refundable: wine and liquor bottles (no CRV), dirty or broken containers.

Give the refund as

Taken off the total after tax. The refund is money back to the customer, not a price discount, so sales tax doesn't change. Anything more than the total is paid in cash.

Total	\$84.40

Customer saves \$1.98

💳 **Payment · \$84.40**

Empty containers become money off the purchase.

WHAT IT'S FOR

When a customer brings back empty cans and bottles, the cashier counts them by type. Each container is refunded at its California redemption value (CRV) and taken off the purchase, or paid in cash.

WHAT YOU CAN DO

- Aluminum, plastic and glass under 24 oz at 5¢; anything 24 oz or more at 10¢ (rates from Settings)
- Quick +6, +12 and +24 buttons for packs and cases
- Taken off after tax: it's money back, not a discount, so tax doesn't change; any extra is paid in cash
- Warns over 50 of one material (the store may pay by weight); wine and liquor bottles aren't refundable
- Shown on the order, customer screen, printed and digital receipts, and the end-of-day report

WHAT IT'S FOR

Staff sign in with a PIN. The till is opened by counting the float and closed with a blind count: the expected cash appears only after the cashier submits, and any difference goes on the end-of-day report.

WHAT YOU CAN DO

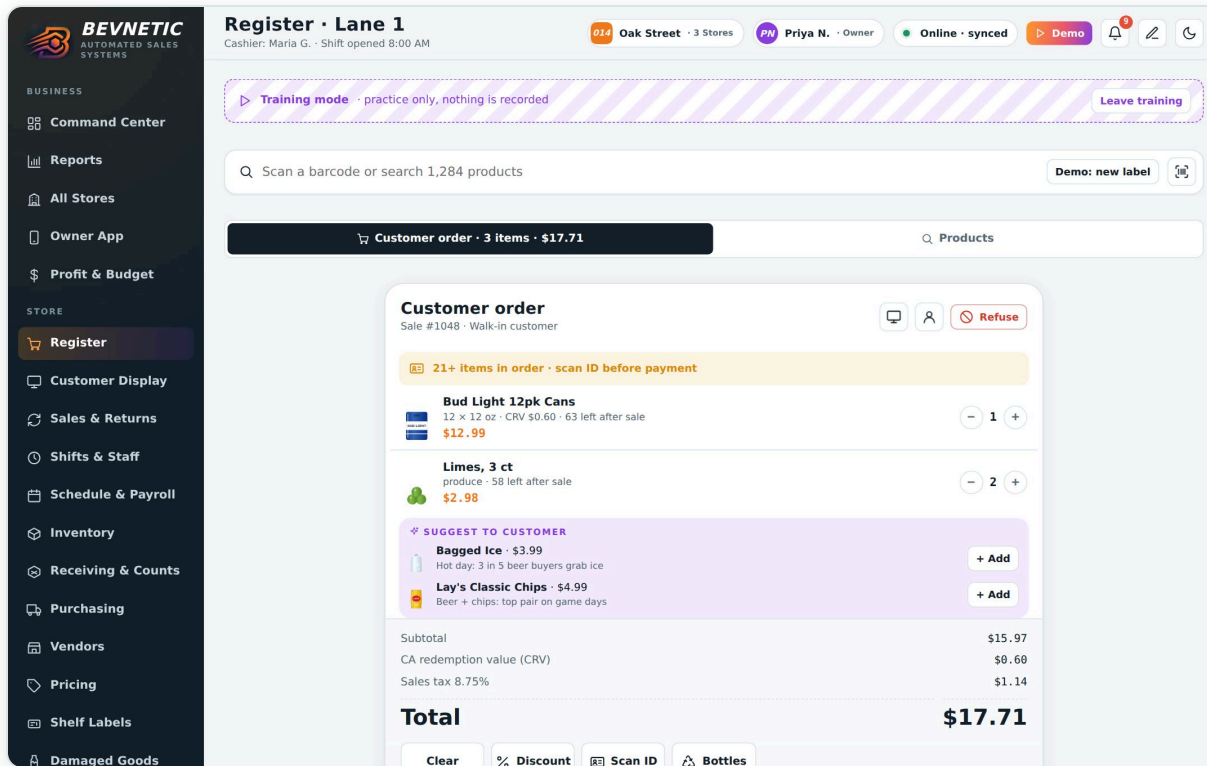

- Open and close the till with a count by bill
- Time clock with weekly hours (cashiers see only their own)
- Recent shifts with over/short (managers and owners)
- “Who can do what” table built from the same rules the app enforces
- Training mode for new staff: practise real sales without recording anything

WHO USES IT

Everyone

Training mode

New staff practise on the real register.

WHAT IT'S FOR

Started from Shifts & Staff. A striped banner shows on every screen, and sales, ID scans, returns and payments all work as normal, but nothing is recorded: no stock, sales, cash or loyalty points change.

WHAT YOU CAN DO

- Start and leave from Shifts & Staff or the banner
- The payment screen says “Practice sale” instead of Approved
- Safe for a new hire's first shift before they sell for real

Swap a shift

WHAT IT'S FOR

Tap a cell to set Open, Mid, Late, Close or off. The screen adds up hours and labor cost against forecast sales and warns about gaps, such as too few people on the late shift on a Saturday.

WHAT YOU CAN DO

- Weekly grid with each person's rate and hours
- Labor cost as a % of forecast sales; coverage warnings
- Publish and text everyone their week
- Swap and time-off requests from the staff app, approved or declined here
- Staff app: my shifts, swap a shift, request time off

WHO USES IT

Manager, owner (staff use the app)

Payroll export

Total	270.5	11.5	1		\$122.25	\$5,837.75

Hours from the time clock

California overtime is worked out per day (over 8 hours = 1.5x, over 12 = 2x) and per week (over 40 = 1.5x). Meal and rest breaks come from clock-outs.

Export for

Gusto ADP QuickBooks Payroll Paychex Plain CSV

Download payroll file Send to Gusto

WHAT IT'S FOR

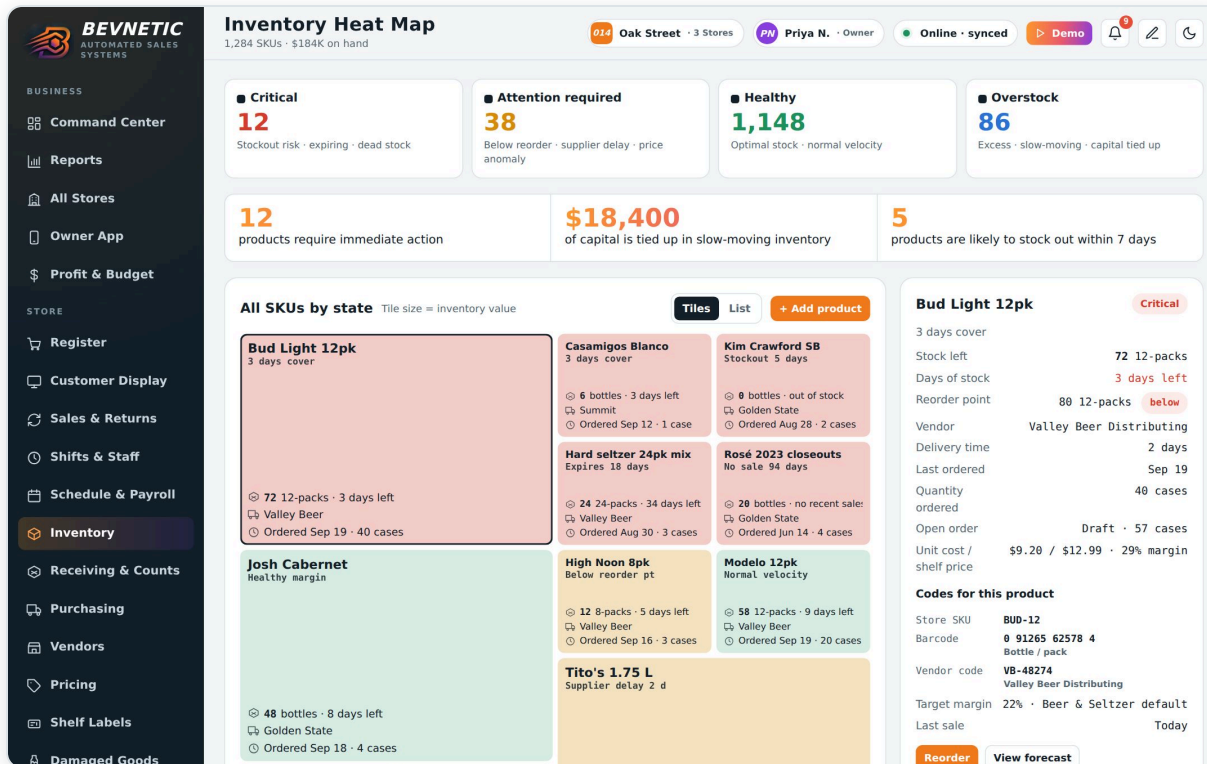

Adds up regular, overtime and double-time hours from clock-ins for the pay period, using California rules (over 8 hours a day or 40 a week is 1.5x, over 12 a day is 2x), plus card tips.

WHAT YOU CAN DO

- Hours, rate, tips and gross pay per person
- Export for Gusto, ADP, QuickBooks Payroll, Paychex or a plain CSV
- Download the file or send it straight to the provider

WHO USES IT

Manager, owner

WHAT IT'S FOR

Tiles are coloured by urgency (critical, warning, overstock, healthy) and show stock left, days left, vendor and the last order. Tap a tile for the full picture and a one-tap reorder.

WHAT YOU CAN DO

- Filter by state; switch to a list sorted by urgency
- Detail: reorder point, delivery time, open order, cost, price, target margin, last sale
- Each product holds several codes (store SKU, bottle and case barcodes, vendor codes); possible duplicates can be merged
- AI action list; + Add product

WHO USES IT

Manager, owner

Add a product

New products in under a minute, including mixers and snacks.

Add a product

Fill in with AI

Reads the name, invoice line or barcode and fills in what it can. Check everything before saving.

BASICS

What are you adding? *

Spirits Wine Beer & seltzer Mixers & ice Snacks

Product name * Brand

Takis Fuego Rolled Chips 9.9 oz Takis

Size * Alcohol Category

9.9 oz None - sells any hour, no ID Snacks

☐ 21+ only (ID check at the register) ☐ Taxable

CRV \$0.00 per unit (not a drink container)

Food (chips, nuts, candy, jerky) is not taxed in California. Turn Taxable on for non-food items like cups or lighters.

Candy bar Cups / supplies

Pack Label

WHAT IT'S FOR

Opens from Inventory, from an invoice line the AI doesn't recognise, or from an unknown barcode at the register (cashiers send it to a manager). Picking the type fills in sensible defaults.

WHAT YOU CAN DO

- Type: spirits, wine, beer & seltzer, mixers & ice, snacks
- CRV worked out from size and pack for drink containers only; snacks default to not taxed
- Case cost → cost per unit → suggested shelf price from the target margin (never below cost)
- “Fill in with AI” reads the name, invoice line or barcode
- Duplicate check offers “Use existing instead”; live register-card preview

Other open orders

PO-10234 · Summit Wine & Spirits
Casamigos x12 · Hennessy VS x12 · 5 more lines · Short 6 Casamigos · invoice HB-58812 Partly received

WHAT IT'S FOR

Receive a purchase order case by case: scan, mark received or damaged. Completing it updates stock, keeps short orders open and opens supplier claims for damage. Shelf counts show live differences.

WHAT YOU CAN DO

- Receive against the PO with scan, received and damaged counts
- Short shipments stay open on the PO
- Count stock by area; differences in units and dollars
- A manager approves the adjustment, recorded as shrink

Add 15 cases to PO

Each brand is sold by one distributor in your area, so Bevnatic compares that distributor's own options. Different products still come from different vendors, and each vendor gets its own PO.

WHAT IT'S FOR

Each brand comes from one distributor, often with several deals (free cases, discounted extra case, volume tiers). Bevnatic compares buying just what you need with each deal, and picks the lowest cost per case that doesn't leave more than 30 days of extra stock.

WHAT YOU CAN DO

- Compare options side by side as cost per case
- Flags deal traps (a “free” case that ties up cash for months)
- Different products from different vendors become one draft PO per vendor
- PO tracker

4 below target

GOES LIVE

Now

Tomorrow 6 AM

Approve 4 prices

PRODUCT	COST PER UNIT	SHELF PRICE NOW	TARGET MARGIN	NEW PRICE	NEW MARGIN	SUGGESTION
---------	---------------	-----------------	---------------	-----------	------------	------------

WHAT IT'S FOR

Costs flow in from vendor price sheets, POs and invoices. Each product has a target margin: its own rule beats a brand/group rule, which beats the category default. The suggested price is $\text{cost} \div (1 - \text{margin})$, rounded to .99 or .49.

WHAT YOU CAN DO

- Cost change → new margin → suggested price, with margin and markup shown
- “Below target · raise”, “Still above target · keep”, “Cost fell · could lower”
- 10% change flag and below-cost block
- Approve now or at 6 AM; register updates and shelf tags are queued

Bevnetic POS · clickable prototype · demo data

33

34 STOCK Compliance

California liquor rules, enforced by the register.

WHAT IT'S FOR

Shows the legal sale-hours timeline (the register locks alcohol after 2 AM), the rules the register enforces, the store ID policy and every sale made without an ID scan.

WHAT YOU CAN DO

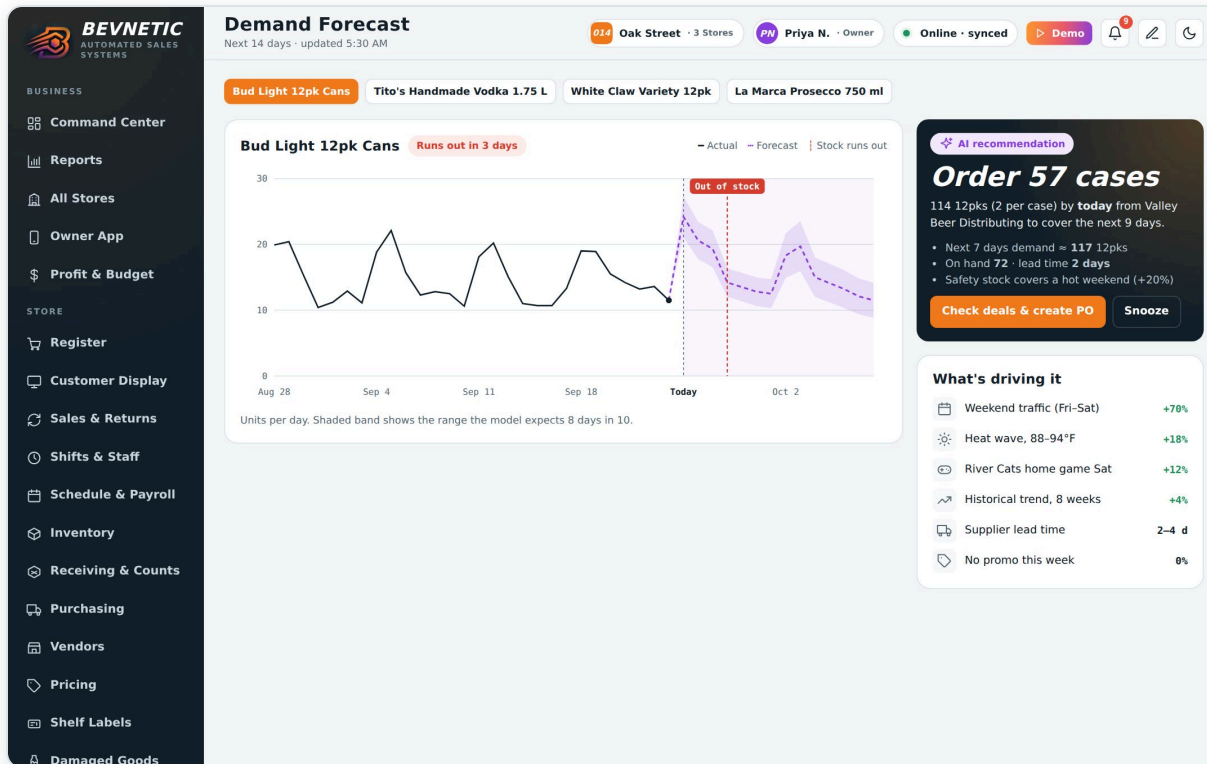

- Sale-hours lock with demo clock
- ID policy switch: scan everyone, under 40 or under 30
- Log of sales without a scan; refusal log; cashier scorecard
- One-tap inspection report

WHO USES IT

Manager, owner

35 INTELLIGENCE Forecasting

Predict demand, don't just track it.

WHAT IT'S FOR

28 days of history plus a 14-day forecast band per product, with the stockout date marked and the drivers explained (weekends, weather, local events).

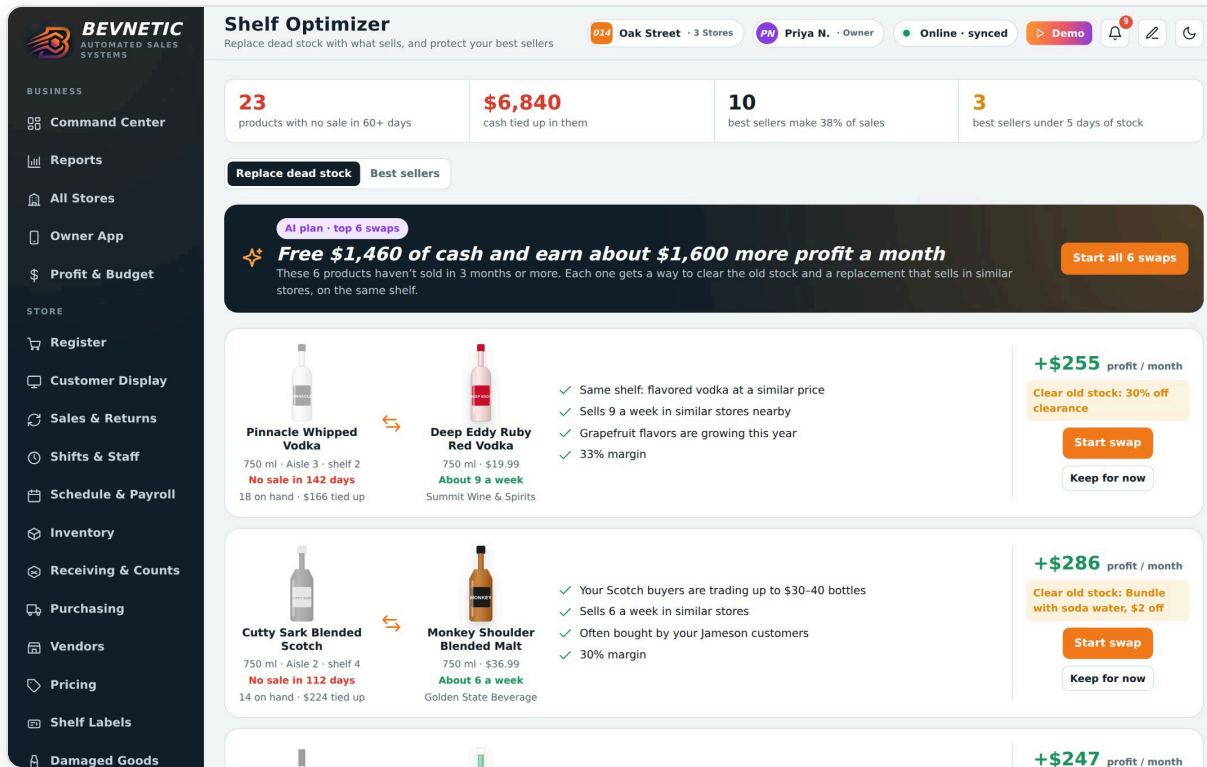

WHAT YOU CAN DO

- Forecast band and stockout marker
- Drivers that move demand
- Reorder recommendation: how much, and by when

WHO USES IT

Manager, owner

Shelf Optimizer

Dead stock out, best sellers in.

WHAT IT'S FOR

Finds products that haven't sold in months and the cash they tie up. For each, it suggests a clearance plan and a replacement that sells on the same shelf in similar stores.

WHAT YOU CAN DO

- Dead stock: clearance offer + replacement with profit per month; one tap starts both
- Best sellers: top 10 by profit, revenue or units over 7, 30 or 90 days
- Trend, days of stock left and reorder buttons

	41%	8	\$11.80	new	\$94.40	☒

WHAT IT'S FOR

Supplier invoices are read in seconds and matched to the catalog. Price rises, short shipments and damaged cases are flagged before anything posts to inventory or accounting.

WHAT YOU CAN DO

- 8-step flow with the source image beside the extracted lines
- Approve, edit or reject each line; price and quantity variances
- Unknown item: "Link to existing product" or "It's a new product"
- Posts to inventory and accounting

- Two items deleted before payment · Jameson x2**
 Thu Sep 25 · 7:22 PM · Maria G. · Lane 2 · \$59.98 · Customer changed their mind (manager note)
 Explained View clip

WHAT IT'S FOR

Compares each cashier's register habits with the store average over 14 days: voids, drawer opened with no sale, refunds without a receipt, price overrides and items deleted before payment. Each flagged event opens the camera clip from that lane at that time.

WHAT YOU CAN DO

- Amber at 1.5x the store average, red at 2x: a pattern to review, not proof
- Events to review, each with View clip and the register events in it
- Mark as explained, or flag it for the owner
- Shrink by product and shift from handover counts; live camera tiles

WHAT IT'S FOR

Member profiles with purchase history, AI segments (e.g. weekend wine buyers, lapsing regulars), and the loyalty program: tiers, points and rewards.

WHAT YOU CAN DO

- Member profile and points
- AI segments with size and value
- Loyalty tiers (Member, Gold, Platinum) and rewards from a free bag of ice to reserving an allocated bottle
- Points are earned on every sale and not on CRV, tax or bottle returns

Campaigns

CAMPAIGN	SENT BY	WHEN	PEOPLE	OPENED	CLICKED
Game-day beer	SMS	Sep 18	636	98%	22

WHAT IT'S FOR

Build a campaign such as “New bourbon arrivals”: pick who gets it, feature new products from the catalog, add an offer and send now or schedule it. The email and text previews update as you type, and results show opens, clicks and sales.

WHAT YOU CAN DO

- Segments from purchase history (e.g. bourbon and whiskey buyers)
- Text (with character count) and/or email with product pictures and prices
- Offer: \$5 off a featured bottle or double points
- Built-in rules: 21+ members only, texts only to people who opted in, STOP to opt out, no texts 9 PM–9 AM, unsubscribe link
- Campaign results: people, opened, clicked, sales

Licences & Deadlines

Never miss a renewal.

Licences & Deadlines
ABC licence, LEAD training, permits and filings

014 Oak Street · 3 Stores · PN Priya N. · Owner · Online · synced · Demo

1 overdue

1 due in the next 30 days

12 licences, permits, trainings and filings tracked

60, 30, 7 days reminders before each due date - owner app + email

Coming up

- Oct: LEAD training - Maria G., Sales and use tax return, CRV recycling report
- Nov: Fire extinguisher inspection
- Dec: Health permit, Tobacco retailer licence
- Jan: City business operations tax certificate
- Feb: Liquor liability insurance
- Mar: LEAD training - Dev P.

Licences, permits, training and filings

Remind me: 60d 30d 14d 7d 1d

Item	Due Date	Status	Action
LEAD training - Sam R.	due Sep 18, 2026	Overdue	Book LEAD, Upload, Renewed
LEAD training - Maria G.	due Oct 12, 2026	Due in 17 days	Book LEAD, Upload, Renewed
Sales and use tax return (CDTFA)	due Oct 31, 2026	36 days	Upload, Renewed
CRV recycling report	due Oct 31, 2026	36 days	Upload, Renewed
Fire extinguisher inspection	due Nov 14, 2026	50 days	Upload, Renewed
Health permit (Sacramento County EMD)	due Dec 31, 2026	97 days	Upload, Renewed
Tobacco retailer licence (CDTFA)	due Dec 31, 2026	97 days	Upload, Renewed
City business operations tax certificate	due Dec 31, 2026	138 days	Upload, Renewed

WHAT IT'S FOR

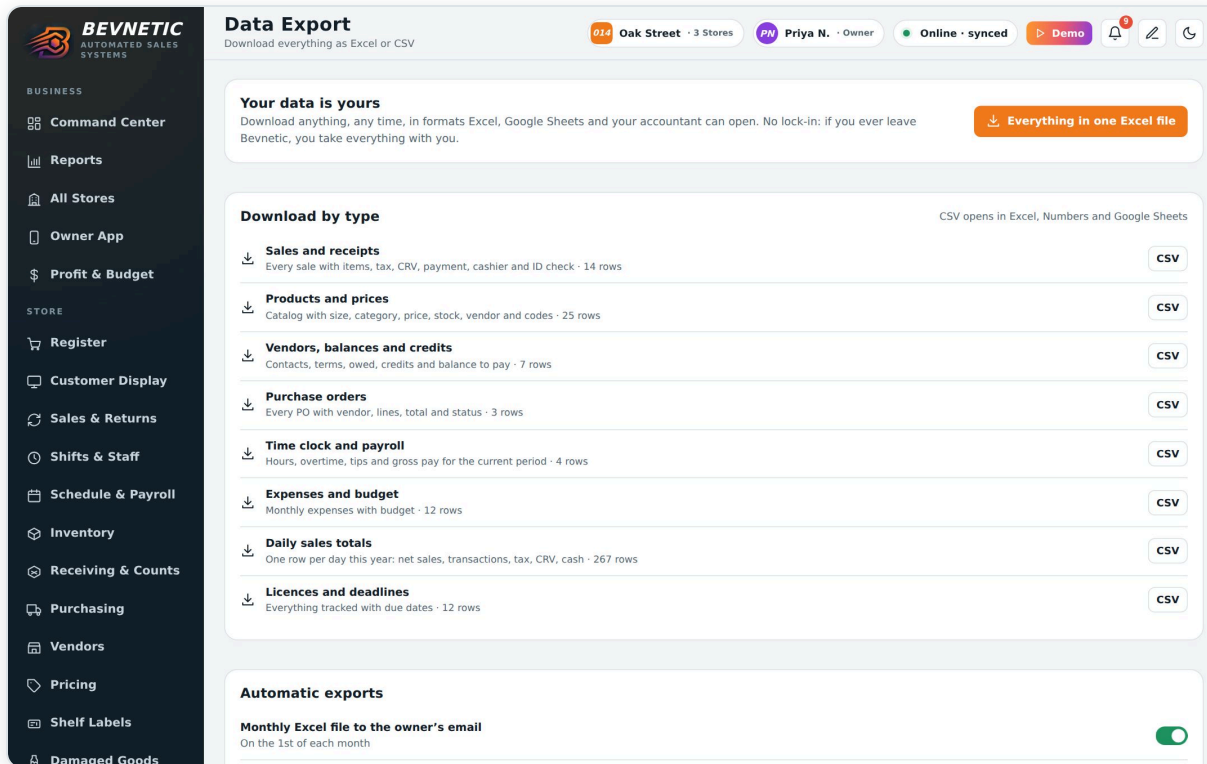

Every licence, permit, staff training and filing with a due date: the ABC licence, each person's LEAD certificate, health permit, tobacco licence, city tax certificate, insurance, sales tax and CRV returns. An expired LEAD certificate raises an alert because that person can't sell alcohol.

WHAT YOU CAN DO

- Overdue and due-soon counts, and the next six months at a glance
- Reminders 60, 30, 14, 7 or 1 day before, by owner app and email
- Book LEAD training, upload the new certificate, mark as renewed (the next due date rolls forward)

WHO USES IT

Manager, owner

**WHAT IT'S FOR**

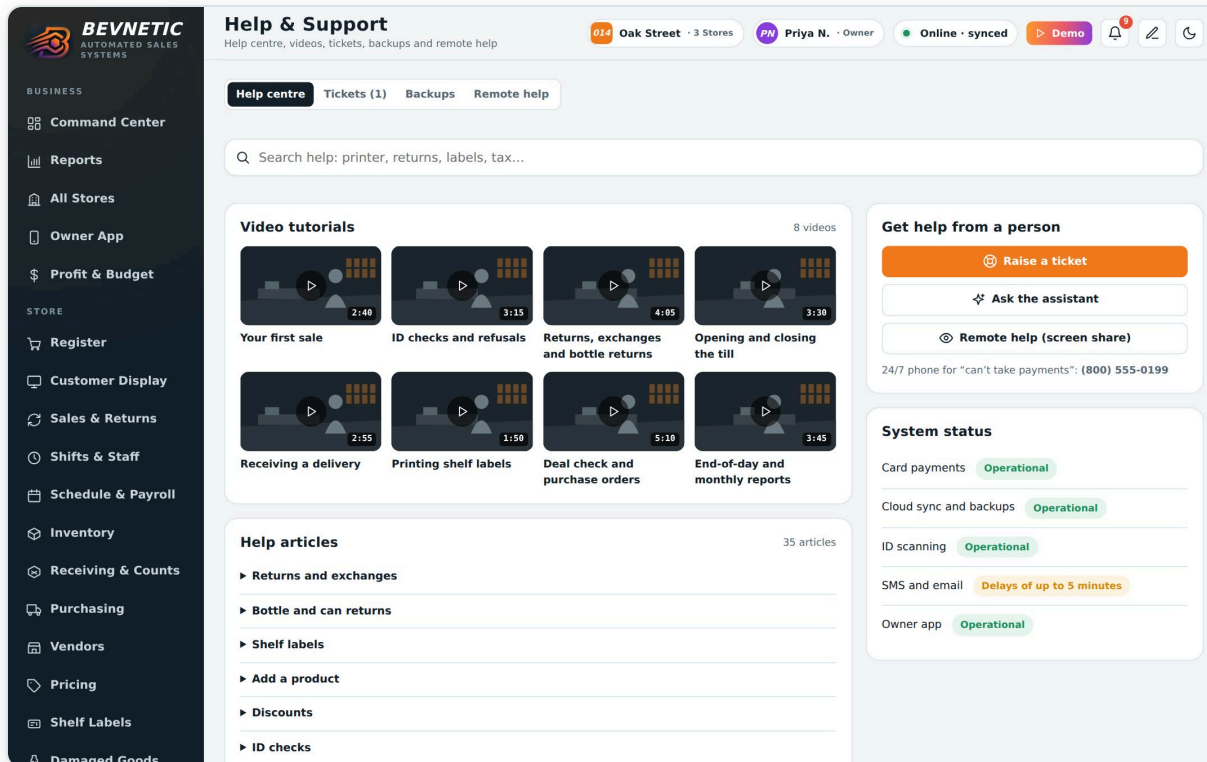

Download any data in files Excel, Google Sheets and accountants can open, or everything at once. Nothing is locked in.

WHAT YOU CAN DO

- One Excel file with a sheet for each type of data
- CSV for sales and receipts, products, vendors, purchase orders, payroll, expenses, daily totals and deadlines
- Automatic exports: monthly file by email, nightly copy to Google Drive or Dropbox, QuickBooks / Xero journal

WHO USES IT

Owner only

**WHAT IT'S FOR**

A searchable help centre with articles and short video tutorials, the status of card payments and other services, and the ways to reach a person: a ticket, the assistant, remote help or the 24/7 phone line.

WHAT YOU CAN DO

- Search articles and videos (printer, returns, labels, tax...)
- Video tutorials for the everyday jobs
- System status for payments, sync, ID scanning, SMS and the owner app
- Ask Bevnetic can hand a chat to a ticket: "Still stuck? Talk to a person"

If this computer breaks, sign in on a new one and everything comes back from the cloud copy. Card numbers are never stored.

WHAT IT'S FOR

The POS backs up every night after close, on the computer and in the cloud, and keeps 30 days. Remote help lets a support person see (or, if you allow, control) your screen during a session you start.

WHAT YOU CAN DO

- Back up now; restore any day (the current state is saved first, so you can undo)
- Remote help: start a session, read the code to support, press Allow
- A banner shows while support is connected; end it any time
- Card numbers and PINs are always hidden; every session is logged
